## Summary

Adaptable and quick-learning Full Stack Developer with over 5 years of experience. Proficient in designing, developing, and deploying web applications and backend services, particularly for international clients. Demonstrated expertise in leading teams and delivering scalable solutions. Continuously seeking to enhance skills with emerging technologies.

## Experience

Krofile LLC

Nov 2024 - Present

Full Stack Developer

Concord, NC 28025 United States (Remote)

https://krofile.com/

- Led backend development for all company projects, from initial architecture and setup to deployment.
- Designed and implemented core backend features, including subscription management using Stripe, user authentication, and admin dashboards.
- Collaborated closely with the product and design teams to ensure scalable, secure, and maintainable code.
- Served as the lead developer for the company CMS landing page using payloadCMS, focusing on performance optimization, responsive design, and seamless user experience.
- Acted as a senior technical advisor across teams, helping prioritize features and guide development standards.

Freelance / Independent Projects (Ran in parallel with full-time roles)

Jan 2020 - Present

Full Stack Developer

Remote

- Application Management & Student Management Systems** (Local-France Client – 2025)  
Designed, developed, and deployed full-stack management systems with **React frontend** and **NestJS backend** for a Pokhara–France consultancy (**theroyalien.com**). Enabled streamlined student applications and internal administration.
- E-commerce Price Tracker & Discord Bot** (US Client – 2025)  
Built a full-stack price tracker platform with Discord bot integration. Users authenticate via Discord OAuth, add the bot to their server, and receive real-time product price drop alerts via Discord and email. Technologies: **Next.js, Tailwind CSS, Zustand, Node.js (Express), Puppeteer, MongoDB, Discord.js**.
- Futsal Booking System** (Local Client – 2024)  
Developed a full-stack booking platform with separate dashboards for vendors and players. Integrated tournament management features including bracket generation, round progression automation, and winner announcement. Tech: **Django backend, React.js frontend**.
- Google Calendar Integration Plugin** (US Client – 2024)  
Created a custom WordPress plugin to track bookings and appointments, automatically syncing data with Google Calendar, including meeting scheduling and reminders. Tech: **WordPress, Google Calendar API**.
- Custom Payment Gateway Plugins** (US Client – 2024)  
Developed multiple WordPress plugins enabling secure payments, recurring billing, and integration with **Stripe, MRP Pay, Monarch.is**.
- Marketing Analytics Admin Dashboard** (US Client – 2024)  
Built a responsive admin dashboard for a machine learning-driven lead generation platform using **React.js** and **REST APIs**, optimized for performance and scalability.
- Vehicle Rental System** (Local Client – 2024)  
Designed a full-stack vehicle rental system with real-time notifications and dynamic cost calculation based on distance via mapping APIs. Tech: **.NET backend, Angular frontend**.
- Government-Affiliated Web Application** (Local Government – 2023)  
Collaborated as a backend developer to build a secure, personalized web application. Tech: **Backend Development**.
- Grocery Store Web App** (Japan Client – 2023)  
Co-built a localized WordPress site for an online grocery store in Japan with payment integration (**pokharatrading.jp**). Tech: **WordPress, WooCommerce**.
- Plant Paradise** (Local Client – 2022)  
Implemented frontend UI for an online plant purchase platform using **React.js, Mantine-UI**, with real-time product availability and order management.
- Venue Booking Platform** (Local Client – 2022)  
Developed a full-stack venue booking platform with **React.js, Mantine-UI, PHP**, featuring real-time availability and booking management.
- Calendly Backend Clone** (Aus Client – 2021)  
Built a scalable backend clone of Calendly with scheduling, user authentication, and availability management using **NestJS**.
- Truck Management System** (Local Client – 2019)  
Created a fast, efficient logistics management system tailored to a local trucking company’s requirements. Tech: **C language**.

Prsym Inc

Oct 2024 - Nov 2024

Full Stack Developer

Delaware, United States Of America (Remote)

https://www.linkedin.com/company/prsym/

- Led the end-to-end development of the company's MVP demo within a strict one-month contract period.
- Designed and implemented both backend and frontend components, ensuring timely delivery of a functional product aligned with startup goals.
- Collaborated directly with the CEO and CTO to define technical requirements and milestones.
- Managed a small technical team, performed code reviews, and ensured code quality and performance standards were met.

Brand Builder Nepal

Nov 2023 - Oct 2024

Sr. Backend Lead

Niva Galli, Pokhara 33700, Nepal (On-Site)

https://brandbuilder.com.np/

- Led the development of **10+ custom WordPress plugins**, including payment integrations for US clients.
- Senior Backend Developer for a **POS project**, overseeing architecture, design, and functionality.
- Managed **AWS infrastructure**, ensuring smooth deployment, scaling, and maintenance of client projects.
- Designed system architecture** for various projects and actively participated in the **technical recruitment** process.
- Managed a **team of 5 developers** for a major US-based project, coordinating backend tasks and ensuring timely delivery.

Sozo Creations

Jun 2022 - Jan 2023

Software and Shopify Developer

Sydney, Australia (Remote)

https://sozocreations.com/

- Contributed to frontend development using **React** and developed backends using **NestJS**.
  - Helped build and launch **Shopify websites** from scratch for clients.
- https://fayshell.com/

The Office

Jan 2023 - April 2023

Backend developer

Birauta, Pokhara 33700, Nepal (Hybrid)

- Designed and developed **5+ websites and software systems** for various clients.
- Improved system flow, analyzed data usage, and streamlined work processes.
- Worked with **Git** and various cloud-based project management tools to maintain version control and project collaboration.
